

Patient Name: Sample Patient
Referring Physician: John Doe, M.D.
Specimen #: 10000000
Patient ID: 20000000-1

Client #: 12345

City Hospital
1 Main Street
Anywhere, USA

DOB: 00/00/1971 Date Collected: 09/19/2012
AGE: 41 Date Received: 09/20/2012
SSN: ***_**_**** Lab ID:
Hospital ID:

Indication: Abnormality seen on ultrasound - multiple congenital anomalies (MCA)

Data used in interpretation: Gestational age: 17.3 weeks
Method: 09/19/2012 US

RESULTS:

Patient Level:	14.19 µg/ml (1.17 MoM)
Expected Range:	up to 24.32 µg/ml (2.00 MoM)

INTERPRETATION:

This amniotic fluid AFP is within expected limits for a pregnancy at this gestational age.

A normal amniotic fluid AFP rules out open spina bifida in approximately 96% of fetuses.

Integrated Genetics is a business unit of Esoterix Genetic Laboratories, LLC, a wholly-owned subsidiary of Laboratory Corporation of America Holdings.
